Euscorpius is the first research publication completely devoted to scorpions (Arachnida: Scorpiones). *Euscorpius* takes advantage of the rapidly evolving medium of quick online publication, at the same time maintaining high research standards for the burgeoning field of scorpion science (scorpiology). *Euscorpius* is an expedient and viable medium for the publication of serious papers in scorpiology, including (but not limited to): systematics, evolution, ecology, biogeography, and general biology of scorpions. Review papers, descriptions of new taxa, faunistic surveys, lists of museum collections, and book reviews are welcome.

Derivatio Nominis

The name *Euscorpius* Thorell, 1876 refers to the most common genus of scorpions in the Mediterranean region and southern Europe (family Euscorpiidae).

Euscorpius is located at: <https://mds.marshall.edu/euscorpius/>

Archive of issues 1-270 see also at: <http://www.science.marshall.edu/fet/Euscorpius>

ICZN COMPLIANCE OF ELECTRONIC PUBLICATIONS:

Electronic ("e-only") publications are fully compliant with ICZN ([*International Code of Zoological Nomenclature*](#)) (i.e. for the purposes of new names and new nomenclatural acts) when properly archived and registered. All *Euscorpius* issues starting from No. 156 (2013) are archived in two electronic archives:

- **Biotaxa**, <http://biotaxa.org/Euscorpius> (ICZN-approved and ZooBank-enabled)
- **Marshall Digital Scholar**, <http://mds.marshall.edu/euscorpius/>. (This website also archives all *Euscorpius* issues previously published on CD-ROMs.)

Between 2000 and 2013, ICZN *did not accept online texts* as "published work" (Article 9.8). At this time, *Euscorpius* was produced in two *identical* versions: online (ISSN 1536-9307) and CD-ROM (ISSN 1536-9293) (laser disk) in archive-quality, read-only format. Both versions had the identical date of publication, as well as identical page and figure numbers. *Only copies distributed on a CD-ROM* from *Euscorpius* in 2001-2012 represent published work in compliance with the ICZN, i.e. for the purposes of new names and new nomenclatural acts.

In September 2012, ICZN Article 8. What constitutes published work, has been amended and allowed for electronic publications, disallowing publication on optical discs. From January 2013, *Euscorpius* discontinued CD-ROM production; only online electronic version (ISSN 1536-9307) is published. For further details on the new ICZN amendment, see <http://www.pensoft.net/journals/zookeys/article/3944/>.

Summary

This anniversary issue of the electronic, open-access journal “Euscorpius” contains a list of all new taxa described in the journal in 2002–2020. The list includes 295 new species and 24 new genera of scorpions. A chronological list of referenced issues is appended.

Introduction

Since its inception in 2001, the electronic, open-access journal “Euscorpius” (Occasional Publications in Scorpiology) has published 300 issues authored by 166 zoologists from 38 countries: USA, Argentina, Austria, Belgium, China, Colombia, Croatia, Cuba, Czech Republic, Dominican Republic, Egypt, France, Germany, Greece, Guadeloupe, Guatemala, India, Iran, Iraq, Israel, Italy, Kazakhstan, Mexico, Morocco, The Netherlands, Norway, Pakistan, Panama, Poland, Romania, Russia, Serbia, Somaliland, Sri Lanka, Switzerland, Turkey, United Kingdom, and Venezuela.

In 2002–2020, “Euscorpius” published descriptions of 295 new species and 24 new genera of scorpions. The type specimens of new species described in the journal originate from 71 countries: Afghanistan, Algeria, Andaman Islands, Australia, Austria, Bahrain, Bosnia & Herzegovina, the British Virgin Islands, Bulgaria, Cambodia, Cameroon, Chile, China, Colombia, Croatia, Democratic Republic of Congo, Djibouti, Dominican Republic, Egypt, Eritrea, Ethiopia, Greece, Guadeloupe, Guatemala, Guyana, Haiti, Honduras, India, Indonesia, Iran, Iraq, Israel, Italy, Jordan, Kazakhstan, Kenya, Kyrgyzstan, Laos, Libya, Lithuania (amber), Madagascar, Malaysia, Mauritania, Mexico, Morocco, Myanmar, Nepal, Oman, Pakistan, Panama, Peru, Philippines, Saudi Arabia, Slovenia, Somalia, Somaliland, Sri Lanka, Suriname, Tajikistan, Thailand, Tunisia, Turkey, Turkmenistan, Uganda, USA, Uzbekistan, Venezuela, Vietnam, Western Sahara, and Yemen.

“Euscorpius” is an expedient and viable medium for the publication of serious papers in scorpiology, including (but not limited to): systematics, evolution, ecology, biogeography, and general biology of scorpions. Review papers, descriptions of new taxa, fauna surveys, lists of museum collections, and book reviews are welcome.

To ensure maximal international audience, submissions are accepted only in English language.

Acknowledgements

We join dozens of colleagues who published their important findings in “Euscorpius” in expressing a profound gratitude to Michael Soleglad for his incredible enthusiasm and selfless effort, which allowed to develop and produce this journal since its inception.

We thank Graeme Lowe, Rolando Teruel, and Matthew R. Graham for their constant, unflinching professional support and friendship over many years. We also thank all the reviewers who cooperate with the journal.

V.F. is especially grateful to Larry Sheret, the Scholarly Communication & Open Educational Resources Librarian, Marshall University, for his great help and enthusiasm in transitioning “Euscorpius” to the Marshall Digital Scholar (MDS), an electronic Institutional Repository.
